

In the Spotlight...

Our Mission – The mission of Fairview Hospital is to improve the health of all people in the southern Berkshires, tri-state region with high quality health services regardless of their ability to pay.

Our Background – For over a century, Fairview Hospital has been the trusted provider of healthcare in the southern Berkshires. In recent years, Fairview Hospital has received national recognition as being in the top 10% of hospitals nationwide for high patient satisfaction and patient experience among its honors. Fairview Hospital is a Joint Commission accredited community hospital which has been federally-designated as a Critical Access Hospital and Massachusetts DPH Primary Stroke Center.

Fairview is proud to be a member of Berkshire Health Systems, offering “the strength of a healthcare system with the feel of a community hospital. A general acute care hospital offering inpatient medical services, general surgery, orthopedics, and maternity services with 24-hour emergency and hospitalist coverage, Fairview also provides a full range of ambulatory surgical services which include general surgery, gynecology, orthopedics, urology, plastic surgery, ophthalmology and gastroenterology. Additionally, Fairview offers outpatient ancillary diagnostic and therapeutic services, wound care and hyperbaric oxygen therapy, cardiopulmonary rehab, physical and occupational therapy services, as well as a full range of primary care affiliated practices supporting the health and wellbeing of our community.

Our Blueprint for Success – As a federally-qualified Critical Access Hospital, Fairview is recognized as a vital health resource and a key economic engine in our rural community. Fairview’s affiliation with Berkshire Health Systems will continue to be the foundation for Fairview’s clinical and operational success. Our commitment to provide a highly trained medical team, supported by investments in diagnostic and therapeutic technology, will assure the highest quality clinical care. Service excellence and positive patient experiences will remain our focus.

Rural hospitals like Fairview face ongoing challenges similar to urban hospitals, including physician recruitment, population health concerns, a shifting regulatory and payment environment, and the increasing challenges of providing cost efficient, high quality clinical care. Community support will continue to be a key factor in Fairview’s future success, both in its service utilization and continued philanthropic support as we embark upon our second century offering high quality healthcare provided with an outstanding patient experience.
